

Dear Speaker Pelosi,

As organizations that are committed to advancing health and racial justice from the 12 states that have not expanded Medicaid, we are writing to thank you for your leadership in committing to fix the Medicaid “coverage gap” in the FY2022 Budget Resolution. With over 2.2 million uninsured people in the coverage gap across our states – the majority of whom are people of color – **it is a moral and economic imperative that Congress approves a comprehensive and permanent fix to the Medicaid coverage gap in the “Build Back Better” reconciliation bill.**

Since the 2012 Supreme Court decision *NFIB v. Sebelius*, which made the Affordable Care Act’s Medicaid expansion a state option, policymakers in our states have refused to expand despite support from a majority of our residents and overwhelming evidence that it leads to significant improvements in coverage, health outcomes, and financial security. Medicaid expansion has also been a central strategy for narrowing long-standing racial disparities in coverage and access to care.¹

We thank you for including a substantial new financial incentive for holdout states to adopt Medicaid expansion in the American Rescue Plan Act. This incentive is enough to cover each of our states’ shares of expansion costs for at least three years, according to Manatt Health researchers.² And yet, it is not enough to overcome purely political opposition from policymakers in our states, with no additional states adopting Medicaid expansion since the passage of the ARP in March.

Our organizations and our partners have worked tirelessly since 2012 to convince state policymakers to expand Medicaid, but the reality remains that our states are unlikely to expand coverage without federal action anytime soon. **People in our states—most of whom are people of color—are being denied basic, life-saving coverage, and the dignity and benefits that come with it. These are benefits that Americans in 38 other states enjoy, and ones that Congress fully intended for people in every state to obtain when it included Medicaid expansion in the ACA.**

As you begin drafting the Build Back Better reconciliation bill, we urge you to ensure it includes a coverage gap policy solution that is **comprehensive** and **permanent**. This is why these principles are so essential to our organizations and communities:

- **Comprehensive:** We support a policy that expands coverage to Americans regardless of the zip code or state they live in. Only in this way can we deliver health care coverage

to low-income residents and communities of color across our states without interference from state leaders. It also ensures coverage across the board, promoting regional equity rather than limiting coverage to residents of specific counties or localities with more healthcare resources or tax revenues. A comprehensive direct coverage option allows us to shift our work away from fighting state leaders, and towards enrolling eligible individuals immediately, many of whom have been waiting a full decade for affordable coverage.

- **Permanent:** Our residents deserve to know they will continue to have access to affordable health coverage not just today, but tomorrow. For this policy to be successful, we need to deliver coverage for this population for the long term, ideally through permanent law, or failing that, for at least 10 years. Our nation, our communities, and our health care providers need this timeline for political pressures to subside, so that the new coverage option can be fully realized and stabilized. We know from experience that debates around the coverage gap are more often about politics than policy, and we don't want our residents to lose basic, life-saving benefits with the next election cycle.

The Build Back Better reconciliation bill is an historic opportunity to make transformative changes ranging from nutrition to energy, from child care to health care. With this bill, our nation can finally realize the original intent of the ACA: to extend affordable and comprehensive health coverage to all Americans, no matter where we live. Closing the Medicaid coverage gap is the centerpiece of that vision. It is the policy improvement that will do the most to lower our nation's uninsured rate while making meaningful and necessary progress to address racial disparities in health care.

We are grateful for your leadership on this bill and are eager to work with you and your colleagues over the coming months to make this promise a reality.

Sincerely,

#IMPACT
